At SourcEdge, we live and breathe in the world of IT for health plans. We serve as a trusted technology solutions provider, staying on top of the regulatory mandates to protect patient information.

Flexible Engagement

Project Delivery

We lead and implement full lifecycle projects that maximize the value from IT systems, meet regulatory requirements, gain operational efficiencies, and secure competitive advantages.

Consulting

To meet the customized needs of our clients and fill the gaps between staff augmentation and full-implementation, we provide à la carte consulting services for technology-enabled healthcare.

Staff Augmentation

Through our broad and deep healthcare network of talented people, we augment our client's staff with experts who understand the business and technologies our clients rely on every day.
