

Value-Based Care Initiatives

Experts in organizing and analyzing massive amounts of data

The landscape in the healthcare ecosystem is rapidly evolving from fee-for-service to value-based care (VBC), which means that health plans must analyze their data in new and different ways. As experts in organizing and analyzing massive amounts of data, we provide cloud-based analytics in a self-service format, allowing our clients to accelerate their VBC initiatives in the market.

Our Services

Strategy

- VBC Readiness Assessments
- Claims Data Analysis
- BPCI-A & Commercial Episodes
- Best Approach Analysis
- Technology Roadmap

Implementation

- VBC Design Architecture
- Self-Service BI Platform Design
- Episode Definitions & Configuration
- Automated Episode Grouping for VBC Contracting

Operations

At SourcEdge, we live and breathe in the world of IT for health plans. We serve as a trusted technology solutions provider, staying on top of the regulatory mandates to protect patient information.

Flexible Engagement

Project Delivery

We lead and implement full lifecycle projects that maximize the value from IT systems, meet regulatory requirements, gain operational efficiencies, and secure competitive advantages.

Consulting

To meet the customized needs of our clients and fill the gaps between staff augmentation and full-implementation, we provide à la carte consulting services for technology-enabled healthcare.

Staff Augmentation

Through our broad and deep healthcare network of talented people, we augment our client's staff with experts who understand the business and technologies our clients rely on every day.
